*Closed means we have sold all of our holdings in this stock, closing the position.

This month's performance vs. S&P 500

Analyst's notes

Our inaugural month of reporting on the Briefs Finance Fund!

While the initial allocation and structuring took place throughout 2025, it was formatted for this first report on January 1st, so we're considering the inception date as January 1st, 2026.

This month was about allocation - we continued to buy into the Japanese market ahead of the snap general election on February 8th, which should be a major catalyst.

We closed our position on NGVC and SFM as this shift did not play out as predicted.

Disclosure: Under our current investment strategy and based on 51 trades with a win rate of 70.59% across winners and losers, Our lead investor's stock selections outperformed the S&P 500 by approximately 7.6% from 01/01/2026 to 01/29/2026
